Press Release

SURVEYORS SET TO BUILD ON SUCCESS AT E-SPACE

A chartered surveying practice is set to take advantage of one of the most successful business centres in the District by moving to e-space south in Ely.

ST1 Consulting Limited, who specialise in providing quantity surveying support to construction companies, contractors and law firms across the country have become the newest resident of e-space south.

The company is built on the experience of the principle directors Phil Tyler and Andrew Silley, who have between them over 30 years' experience within the construction industry.

Andrew, Director of ST1 Consulting, said: "The opening of the ST1 office at e-space south has been seamless and the support from Kathy Brumpton, the Centre Manager, and her team has been excellent. We have found the facilities on offer at e-space south to be second to none and just what was required for the business launch of ST1."

Kathy Brumpton, Centre Manager, said: "A recent study highlighted that the e-space centres continue to offer real value for money compared to other business centres across Cambridgeshire. In addition to the excellent service that we provide to our tenants, we also offer tremendous flexibility given that leases are available for an initial six-month period with one month's notice required by either party.

"In these difficult economic times, the centres offer excellent opportunities for small businesses to develop and grow providing a professional image to their clients without the financial worries of costly overheads. So if you are interested in finding out more about us please get in touch with us."

e-space south is a serviced office business centre that has been operating since 2001. The building is owned and managed by East Cambridgeshire District Council. A limited number of units are currently available on flexible monthly leases at competitive prices. A larger facility is also located just off the A10 in Littleport offering units from 150 to 650 sq ft, which are ideal for small companies wishing to take on their first commercial premises.
